Please support the Stone Spring Medical Center. The Dulles South area is in desperate need of hospital services.  
Thanks!

Subject: ROUTE 50 HOSPITAL - PLEASE SUPPORT

Dear Loudoun Board of Directors:

Please continue to support HCA (Hospital Corporation of America) to build the StoneSpring Medical Center (SMC) on their Route 50 property!

As a parent living in South Riding we are very limited in medical support.

Urgent care hours are the same as pedestrian office. They don't have extended hours and if you are a parent to young ones, you know that most needs are after hours. Ear infections and cuts that need attention and all the childhood illness. Most recently I was having heart attack like symptoms and the closes facility was Fair Oaks during rush hour traffic. As a mother (distance) for medical care can be scary especially when you are in dire need. South Riding and the other surrounding communities which are continuing to grow, we deserve a hospital.

I had to dire to Tyson's for X-rays and Ashburn for blood work. We don't have anything in our back yard.

We already lack community services, Louodoun BOS have forced HOA to supply and meet the needs of our residents in the Dulles South area where most other jurisdictions. We still need the phases for the Multi-purpose center (pools and recreation). All the store development (slated off of 50) still hasn't begun, so we are forced to drive congested road ways to meet the basic needs of our family. At least we could have peace of mind, having a full functional medical facility minutes away.

Current hospitals are 7 miles away, which in general sounds -close but when you calculate traffic it makes the distance at least a 45 min commute.

Please support Dulles South Families and vote YES to allow a medical facility to be built on RT.50.

Thank you,

Kristen Blaylock Reed

Please think about putting a hospital closer!! I delivered a baby in september (without an epidural- not by choice) I went into labor at home, and barely made it to reston hospital before the baby came. If there were complications i never wouldve made it in time, the perilous drive down route 50 in traffic was excruciating.

I am a physician assistant and i have worked in the ER for 10 years. I would and my family would love for me not to have to drive 40 minutes to the closest hospital for work.

Thanks for your consideration in building an important part of the community closer to my home- Alyssa Laeser
